

Meeting Minutes

QGC Central/Southern Regional Community Committee

Thursday 19 March 2015

Chinchilla Community Connexions, 67- 71 Middle St, Chinchilla

1. Opening

The 1st meeting of the QGC Central/Southern Regional Community Committee was called to order at 09:00am on Thursday 19 March at Chinchilla Community Connexions, facilitated by Ms Deb Camden, Independent Facilitator.

2. Attendees

The following people attended the QGC Central/Southern Regional Community Committee meeting:

QGC Central/Southern Regional Community Committee Members	QGC Representatives
<ul style="list-style-type: none"> • Bill Blake, Chinchilla Community Commerce and Industry • Leanne Evans, Chinchilla Community Unity Group • Leisa Finch, Myall Youth and Community Network Centre • Michael Taylor, Wieambilla Estates Rural Subdivision • Beth Wood, Dalby Welcoming Community Committee • Lynne Mason, Chinchilla Family Support Centre • Courtney McLellan, TAFE Queensland South West (Proxy) • Louise Sanderson, Goondir Health Services 	<ul style="list-style-type: none"> • Nagaraj, R, Field Operations Manager South • Ben Power, Manager Land & Environment Technical Services • Elizabeth Cooney, Community Engagement Manager • Rabbie Namaliu, Social Risk Specialist
Apologies	Independent Facilitator
<ul style="list-style-type: none"> • Doreen Goldsmid, Chinchilla Family Support Centre • Terri Cobb, Western Downs Regional Council 	<ul style="list-style-type: none"> • Deb Camden, PRISM Communication Architects

Meeting Minutes

<ul style="list-style-type: none"> • Dean Russell, Dalby State High School • Carolyn Tillman, Councillor Western Downs Regional Council • Kristelle Townsend, QGC, Social Performance Coordinator 	
--	--

3. Meeting agenda

The following items of business were discussed as per the meeting agenda:

Agenda item	Details
a. Introductions and meeting overview	<p>Deb Camden gave a broad overview of the meeting format and acknowledged the traditional owners of the land, recognising past and present elders.</p> <p>Deb Camden led roundtable introductions of Community Committee members and QGC representatives.</p> <p>Elizabeth Cooney provided an overview of the new committee structure. Since the last meetings held in November/December 2014, QGC called for expressions of interest from the present members of the four Gas Field Community Committees to join two new committees, these being the Northern Regional Community Consultative Committee and the Central/Southern Regional Community Consultative Committee.</p> <p>Many committee members submitted interest to continue however some took the opportunity to resign from the committee due to being long standing members.</p> <p>From 2015 QGC will convene two regional community committees in the Western Downs (Upstream) and continues to jointly convene the regional LNG community consultative committee in Gladstone.</p>
b. Safety moment	<p>Deb Camden invited Committee members to share a safety moment.</p> <p>Beth Cooney outlined the role of the control room and Integrated Collaboration Environments (ICE) room in providing detailed safety monitoring which QGC has to operate their facilities across all sites.</p>

Meeting Minutes

Agenda item	Details
<p>c. Adoption of minutes</p>	<p>Deb Camden asked the Committee to formally consider the 3 December 2014 Central Gas Field Community Committee minutes and asked for suggested changes.</p> <p>The 3 December 2014 Central Gas Field Community Committee minutes were adopted.</p> <p>Deb Camden asked the Committee to formally consider the 4 December Southern Gas Field Community Committee minutes and asked for suggested changes.</p> <p>The 3 December 2014 Southern Gas Field Community Committee minutes were adopted.</p> <p>Deb Camden asked the Committee to formally consider the 20 November Regional Gas Field Community Committee minutes and asked for suggested changes.</p> <p>The 20 November 2014 Regional Gas Field Community Committee minutes were not adopted due to no members of the previous Regional Community Consultative Committee being present at the meeting. Adoption of these minutes to be carried over at the next meeting.</p>
<p>d. Actions from previous meeting</p>	<p>Deb Camden reviewed the actions from the previous meeting.</p> <p>New Sewage Facility Ben Power explained to the committee that QGC has no specific demand to utilise the new facility.</p> <p>CSIRO Studies – Best Practice information on vegetation Queensland Murray Darling Committee to pass on information to QGC’s environment team once the study and document has been finalised.</p> <p>Rural Property Management Update QGC environment team to provide an update on the Rural Property Management Strategy later in the meeting.</p> <p>Revised QGC Committee Terms of Reference The new Central/South Community Consultative Committee Terms of Reference will be distributed to committee attendees and discussed as an agenda item later in this meeting.</p> <p>Operations Representative A QGC Operations representative will now attend meetings to answer and discuss technical queries. The Operations representative presenting at this meeting is Nagaraj – Field Operations Manager South.</p>

Meeting Minutes

Agenda item	Details
	<p>Decommissioned Well Photos and information of decommissioned wells has been incorporated into the QGC slide pack being presented at this meeting.</p> <p>QGC Integrated Housing Strategy No further updates are available at present.</p> <p>Industrial Salt Management Ben Power to provide an update on QGC's approach to salt management later in the meeting.</p>

Meeting Minutes

Agenda item	Details
<p>e. Community feedback</p>	<p>Deb Camden invited Committee members to share feedback from their networks.</p> <p>A committee member spoke about the impacts of post-construction accommodation over-supply in the Chinchilla market:</p> <ul style="list-style-type: none"> • Include reduction of daily rates and low vacancy rates for local providers • Reduction in business for real estate agents. <p>A committee member said businesses were seeking information about what opportunities existed for local business participation during operations.</p> <p>A committee member said that school enrolments were relatively stable even with year 7's now transitioning to high school, with approximately 520 enrolled at the Chinchilla State Primary School.</p> <p>A committee member mentioned that due to Miles not being able to host the Local Content Expo, Dalby would now be hosting the event which is scheduled to be held on 30 March 2015.</p> <p>A committee member highlighted concerns from Dalby community members that resource companies should be making greater efforts to ensure employees and contractors were living locally in regional towns.</p> <p>A committee member commented on key focus areas that were identified to assist local companies in promoting their capability to better position themselves for opportunities in QGC's supply chain during operations. This included:</p> <ul style="list-style-type: none"> • Demonstrating capability • Promoting liveability in the community • Strong support from local council. <p>A community member said the general population was being impacted by job losses and limited job opportunities in the region, particularly younger people.</p>
<p>f. Review of QGC RCCC Terms of Reference</p>	<p>Elizabeth Cooney provided an overview of the new draft terms of reference for review by the committee. Key discussion points regarding changes to the terms of reference were:</p> <ul style="list-style-type: none"> • Inclusion of a background summary outlining the

Meeting Minutes

Agenda item	Details
	<p>history of the committees in section two.</p> <ul style="list-style-type: none"> • New names for the committees reflecting the changes to the areas they may represent in section three. • Deletion of the point regarding contribution to indicator development in section four, due to this now being completed. • Discussion around possible changes to the maximum number of non-QGC participants on the committee and appropriate timeframe to review committee membership in section five. • Confirmation of appropriate frequency and duration of meetings in section six. <p>Key changes noted by the committee included:</p> <ul style="list-style-type: none"> • Section one should be amended to delete “on a variety of business issues” • Major towns should be listed and the words ‘surrounding areas’ to be used for other smaller localities. • Committee members agreed to the new name for the committee being ‘Central/Southern Regional Community Consultative Committee’ • Maximum membership should be no more than 12 – 15 members as too larger attendance may not provide committee members with as valuable and in-depth discussion from the meetings. • It is useful to have a timeframe for review of membership to ensure the balance of social, economic and environmental community representatives on the committee. • In section four, the committee agreed to the removal of the second point relating to indicator development. • In section three it may be appropriate to take out “stakeholders from the towns of” and replace with “stakeholders from the areas of”. • At present quarterly meetings continue to be adequate. • Generally it was decided that three hour meetings were suitable. <p>A quorum to approve the changes was not required due to the committee not being a decision making body however</p>

Meeting Minutes

Agenda item	Details
	<p>committee members were asked to read the terms of reference before the next meeting and provide any further feedback to Kristelle Townsend, committee secretariat, by 31 May 2015. An electronic copy of the minutes could be sent through to committee members on request.</p> <p>A committee member asked whether the committee would meet if only a few committee members were in attendance.</p> <p>Elizabeth Cooney responded that QGC would always hold meetings as scheduled regardless of the attendance however if ongoing attendance was low, the committee would be revised to encourage greater attendance.</p>
<p>g. QGC Update</p>	<p>Nagaraj, R, Field Operations Manager South, provided the committee with a QCLNG project update. Key points discussed include:</p> <p>Some key project milestones have occurred since the last meetings in November/December 2014. These include:</p> <p>Sale of the QCLNG Pipeline</p> <ul style="list-style-type: none"> • The QCLNG pipeline sale agreement to APA Group was announced in early December 2014. • The deal will be finalised in coming months. QGC will remain operator of the pipeline for another 12 months from then, and following this APA Group has the option to take over operatorship of the pipeline. • QGC’s rights to use the pipeline will remain unchanged, although QGC will pay a tariff to APA to use it. • APA Group is the largest owner/operator of pipelines in Australia. The deal is worth approximately \$5 billion. <p>First LNG Production</p> <ul style="list-style-type: none"> • First LNG production began from Train 1 of the two-train facility just before Christmas 2014. • Gas to the facility is being supplied from the Ruby Jo Central Processing Plant (CPP) about 40km east of Tara and the Bellevue CPP just south-east of Miles. • First cargo departed QCLNG on 5 January 2015 and was transported to Singapore. • The eighth vessel visited the facility in the first week of March. The next planned vessel will be immediately after the current two week shutdown that is part of the usual commissioning process.

Agenda item	Details
	<p>Further information and updates were provided on the project. Key points include:</p> <p>LNG Shipping Routes</p> <ul style="list-style-type: none"> • Extensive preparations have been made for the start of LNG shipping, with the protection of the Great Barrier Reef central to these plans. • QGC’s Liquefied Natural Gas (LNG) plant is at the southern end of the Great Barrier Reef world heritage area which is one of the most protected and regulated waterways in the world. • BG Group vessels will follow internationally approved routes, which track outside the reef unless otherwise directed by authorities during inclement weather. • Movement through the Great Barrier Reef Marine Park is strictly regulated and monitored by the marine authorities using the Great Barrier Reef and Torres Strait Vessel Traffic Service (REEFVTS). • As an additional measure QGC instructs our vessels to avoid the southern areas of the reef by travelling about 110 nautical miles south of the standard shipping route when entering and leaving Gladstone Harbour. • When we are operating at production plateau in 2016, it will take about 24hrs to load an LNG carrier. <p>A committee asked about the Hub in Singapore.</p> <p>Nagaraj explained that the hub in Singapore was a trading hub and not necessarily the final destination of the gas exported from Curtis Island, although Singapore also bought some gas from QGC.</p> <p>A committee member asked gas prices were linked to oil prices and whether QGC could foresee gas prices being independent to oil prices in the future.</p> <p>Nagaraj explained that gas prices are often indexed to oil prices due to the fact that it is considered an alternate fuel to oil.</p> <p>Exports from Curtis Island</p> <ul style="list-style-type: none"> • In 2016 we expect to reach peak production, resulting in up to 120 shipments of LNG a year. • The cargo will be delivered to BG customers in Singapore, Japan, India and China as well as customers in Taiwan and Korea. • The China National Offshore Oil Corporation (CNOOC) is a foundation partner of QCLNG, holding an equity

Agenda item	Details
	<p>interest in the project as well as committing to LNG purchases of 8.6 million tonnes per annum over 20 years.</p> <ul style="list-style-type: none"> • Tokyo Gas is another foundation customer, signing a 20-year agreement to purchase 1.2 million tonnes of LNG annually. Tokyo Gas has also taken a (much smaller) equity interest in the project. • Additionally, QGC will continue to supply to the domestic market long term until 2027. <p>A committee member asked if there was an Emergency Response plan in place for operations on Curtis Island and for potential shipping incidents.</p> <p>Nagaraj explained that prior to construction of the plant QGC submitted a Safety and Emergency Response Plan to the regulator as part of meeting Government project approval requirements.</p> <p>Ben Power explained that Gladstone Ports Corporation (GPC) had primary oversight of shipping activity in the port, including pilot vessels. GPC coordinates and would activate emergency response plans should a shipping incident occur in the harbour.</p> <p>A committee member asked who operated the LNG vessels.</p> <p>Nagaraj explained that BG Group owned most of their ships and have their own shipping division that are charged with shipping operations.</p> <p>In response to claims that the Queensland CSG to LNG projects were world firsts, a committee member asked what was happening with the gas prior to development of this part of the industry. For example CSG in the USA.</p> <p>Nagaraj explained that natural gas from shales, not coal seams, was being extracted in North America.</p> <p>Next Steps in 2015</p> <p>There are still a few milestones to achieve in 2015 before the first phase of construction of the Queensland Curtis LNG project is complete. These include:</p> <ul style="list-style-type: none"> • Commissioning and testing of Train 1, scheduled to be completed in the coming quarter. • Train 2 is scheduled to come online later this year (Q3). • In the coming months the Jordan CPP about 20km north-east of Tara and the Woleebee Creek CPP 30km

Agenda item	Details
	<p>west of Wandoan, and their supporting wells and field compression stations, will be commissioned in readiness to supply additional gas to Train 2 at the QCLNG facility.</p> <p>Once these steps are complete overall there will be:</p> <ul style="list-style-type: none"> • More than 2,300 wells available for start-up, with more than 2,060 voluntary access agreements • Almost 4,500km gathering pipeline now laid • 17 field compression stations (FCSs) • 4 central processing plants (CPPs) <p>By mid-2016 the QCLNG facility will be operating at its design capacity of about 8 million tonnes per year, with up to 120 LNG carrier visits per year.</p> <p>Central and Southern Operations</p> <ul style="list-style-type: none"> • The gas processing facilities and major pipelines have been constructed in QGC's southern and central tenement areas between Chinchilla and Tara. • There are two Central Processing Plants (CPP's) and nine Field Compression Stations (FCS) now operating in this region, with the Jordan CPP and its three feeder FCS' to come on-stream shortly. • As construction activity declines there should also be a reduction in traffic activity with fewer trucks hauling materials. Instead there will be operators in light vehicles who spend their shifts moving between well sites to monitor their performance. • Drilling of new wells is continuing, but at a reduced rate from that required in 2012-2014 to ensure first LNG production. QGC will be drilling on average 25 wells a month. • Presently there are approximately 600 well sites in the Southern region and 500 in the Central region • For 2015 approximately 460 new wells will be put on production (PoP). • This is an indicative figure as the business is continually reviewing its gas requirements and the areas (North, Central, South) in which to develop wells in line with our existing gas compression facility needs. • Now that the compression stations are running flaring can be managed through these facilities, rather than through individual well sites – unless the facilities were undergoing maintenance.

Meeting Minutes

Agenda item	Details
	<ul style="list-style-type: none"> QGC has 4 drilling rigs and 10 service rigs operating across its southern, central and northern development areas. <p>A committee member asked about the size of the Ruby Jo camp.</p> <p>Nagaraj explained that the actual Ruby Jo camp had 650 beds and an additional 250 bed construction camp was also built.</p> <p>Nagaraj explained that the Operations workforce in the Southern region would be 250-300 people. The floating workforce for shutdowns and major overhauls could be between 150-250 people. All would be adequately accommodated at the Ruby Jo camp for works pertaining to the Southern Region.</p> <p>A committee member made a comment that came from their community that QGC is housing Operations & Maintenance staff in local housing.</p> <p>Elizabeth Cooney explained that ideally QGC would want their staff to live locally where possible from a community integration perspective, but also a cost perspective.</p> <p>Elizabeth Cooney mentioned that QGC's Human Resources function was currently undertaking workforce planning for staff.</p> <p>Elizabeth Cooney reminded the committee that QGC as part of our QCLNG Coordinator General conditions had built houses in the region and were required to house the workforce in camps during construction.</p> <p>A committee member asked why camps were not being closed now that construction was over.</p> <p>Elizabeth Cooney in response said that the QCLNG project required people with unique skills that may not be based locally. In other cases some staff may not want to live locally and may choose to be on roster. This means that FIFO/DIDO were then the options that are available to these staff.</p> <p>Elizabeth Cooney said that QGC had already closed some camps and this was continuing now that construction was over. Some camps would remain open to accommodate the operations workforce.</p> <p>A committee member asked what the average staff retention rates were for QGC as they understood it was nine months.</p>

Agenda item	Details
	<p>Elizabeth Cooney responded that information in relation to employment figures would be explained later in the meeting. However, she reminded the committee that QGC has been in the construction phase until recently and construction contracts were relatively short contracts.</p> <p>Upstream Operations Supply Base</p> <ul style="list-style-type: none"> • Construction of the Upstream Operations Supply Base (UOSB) began in October 2014 and is on track for completion in May 2015 • The UOSB is located in the Chinchilla Industrial Park Cnr Auburn and Osbourne St Chinchilla • Construction is over 85% complete • Once complete the site will warehouse supplies for the ongoing maintenance and operation of QGC’s Upstream facilities. • Overall site size is approximately 20000 square metres or 5.5 acres • Shed size is approximately 4500m² or 1 acre and is 100m long and 45m wide • The shed can fit approximately 2500 pallets • Two 251KL water tanks are installed on site in case of fire and provide water to the heat activated fire safety sprinkler system • There is a weed wash down facility on site • A total of 21 staff members will be based at the office – this will be current staff members who are presently based at other site locations • Environmentally friendly design includes additional insulation, alternatives to fans to promote air flow through building e.g. louvers, vents, LED lighting is used for a majority of lighting, translucent panels provide natural light throughout the shed space, two bio retention filtration pits to capture and filter water run-off from the site. <p>A committee member asked whether QGC considered outsourcing the management of the supply base to the local market.</p> <p>Nagaraj explained that there is a supply chain function in QGC that would operate the supply base and that the facility was primarily a procurement and storage facility.</p>

Agenda item	Details
	<p>Location of Surat Workforce</p> <p>Some forecast workforce data was compiled in December 2014 with indicative workforce forecasts until the end of December 2015. It was acknowledged that these figures may change according to business need.</p> <ul style="list-style-type: none"> • Approximately 30% of our current upstream employees live locally in the region. • QGC encourages our people to live locally and offers a range of incentives including relocation support and allowances. • The roles of some of our workforce are changing and the number of people required on a 24/7 basis, day and night-shift basis will reduce once the business is fully operational. • The business needs to be flexible as many skilled employees prefer FIFO engagement. <p>Transition from construction to operations</p> <ul style="list-style-type: none"> • As QGC transitions to operations we will have less demand, a reduced workforce and fewer contracts • QGC will be spending less per year in operations than during the construction phase • Some local businesses will notice this reduction • Like any business, QGC needs to minimise costs in order to remain sustainable in the long term • QGC maintains an ongoing commitment to local content • Major contractors are required to support local content and Indigenous participation • Major contractors are also required to develop a local content plan, set targets for engagement of local suppliers and report on local content outcomes including local employment and training • QGC has developed a local content strategy which aims to help increase local supplier capability and include local content in our supply chain • Social investment will also support enterprise development and strengthen local chambers of commerce • QGC voluntarily reports on local content outcomes annually to the Queensland Resources Council (local content code of practice)

Agenda item	Details
<p>h. Key Topic Update</p>	<p>Elizabeth Cooney, Community Engagement Manager, provided the committee with an update on the Chinchilla airport repairs and upgrade. Key points include:</p> <ul style="list-style-type: none"> • Chinchilla Airport considered integral to QGC’s central hub • \$4.7 million has been allocated to Western Downs Regional Council (WDRC) airport design and repair project • WDRC will project manage the contractor • Repairs to aid airport operations to include: <ul style="list-style-type: none"> ○ Strengthened pavement (from a PCN 4 to a PCN 6) – improved safety, integrity, reduced maintenance burden for WDRC ○ Stop ways – improved safety and new potential for larger aircraft (e.g. Dash 8 turbo-prop – Qantas flight Brisbane-Roma) ○ Lighting – improved safety at night and during inclement weather ○ Weather station – improved safety from more data available • Repairs will enhance the existing asset and make it a more transport-friendly location for potential businesses • Construction proposed for May – July 2015. • Miles Airport will be the alternative during construction with QGC operating buses between Chinchilla and Miles. <p>Ben Power, Manager Land and Environment, provided the committee with an update on the Land and Environment topics. Key points include:</p> <p>Rural Property Management</p> <ul style="list-style-type: none"> • QGC has moved to a longer term, larger scale approach to managing its rural property portfolio • In late 2014 QGC advertised for expressions of interest (EOI) for tender invites for a number of property zones • The level of interest received through the EOI process was very high • Applications are currently being assessed before inviting tenders • Because of the significant interest, it is taking longer than expected to review all the EOI’s prior to inviting tenders • Once all EOI’s have been reviewed suitable applicants will be invited to tender

Agenda item	Details
	<ul style="list-style-type: none"> • The tender period will be for a length of approximately six weeks which allows some additional time for businesses who are unfamiliar with the process • QGC continue working with existing agistors to manage any short term arrangements. <p>Surat North Approval</p> <ul style="list-style-type: none"> • The Federal Government has approved the Surat Basin Acreage Project under Environmental Protection and Biodiversity Conservation Act 1999. • This authorises development of 400 wells defined by ATP852/ATP768. • If the project is approved by BG Group, project development would take place on about 2500ha, or 2% of the area, with up to 1,400ha affected at any one time. <p>Drop-in Information Session</p> <ul style="list-style-type: none"> • Following on from sessions held last year, QGC is holding another drop-in information session to provide an update on our activities in and around Wandoan • This will give landholders the opportunity to speak face-to-face with QGC representatives, ask questions and provide any feedback they have • Invites have been sent to 100 landholders. <p>Salt Storage and Management</p> <ul style="list-style-type: none"> • Regulated waste facilities are the base case for salt management. • QGC has spent \$20 million investigating technologies to treat salt for commercial use. The technology is not currently feasible. • Salt can be safely encapsulated on two QGC-owned sites at the Central and Northern Water Treatment Plants without trucking salt across Queensland. • QGC is working with industry to share salt facilities wherever possible and minimise the total number. • QGC will be discussing with the new State Government in coming months.
<p>i. Social Investment Update</p>	<p>Elizabeth Cooney, Community Engagement Manager, provided the committee with an update on QGC’s Social Investment Program. Key points include:</p>

Agenda item	Details
	<p>STEM Education:</p> <ul style="list-style-type: none"> Continuing to support programs in primary and secondary schools in the Western Downs – F1 in schools; Wonder of Science, trade camps New partnership in STEM to be announced in coming months. Will cover education, teacher Professional Development, public engagement, research. All Brisbane activities will directly benefit regions Chinchilla State School and State High School involved in pilot. <p>Enterprise Development:</p> <ul style="list-style-type: none"> CCIQ program supporting local chambers well underway with chambers in Chinchilla, Miles, Tara and Jandowae These local chamber members are now also members of the state chamber of commerce, CCIQ and able to access CCIQ services and support including Human Resources and Industrial Relations phone support New chamber websites being launched in March and April Financial support for targeted membership drives for chambers Wandoan chamber now in a position to participate Supporting local business capability and resilience through workshops with chambers First workshops April 21- 22 in Chinchilla. <p>Enhancing Regional Liveability:</p> <ul style="list-style-type: none"> QGC Communities Fund Round 1 open until 31 March; grants assessment panel EOI underway, non-RCCC members can nominate to participate Delivered five information sessions for new Fund in Chinchilla, Tara, Wandoan and Miles Western Downs Road Safety Group. This group has a suite of initiatives to implement; QGC is supporting the groups first campaign. <p>Action: Interested committee members to complete and return the expression of interest (EOI) forms to participate on the grants assessment panel. Non-QGC Community Consultative Committee members can also be nominated by committee representatives for consideration for the panel.</p> <p>Community Engagement:</p> <ul style="list-style-type: none"> Chinchilla Melon Festival QGC Melonheads competition

Meeting Minutes

Agenda item	Details
	<ul style="list-style-type: none"> • Tara Futures Group Year Ahead Luncheon • Wandoan Chamber of Commerce Business Dinner • St Patrick's Day Dinner Dance, Wandoan Health Auxiliary • QGC Community Fund information sessions • Landholder information sessions • Response to activism • QLD Ballet • Launch Operations Bulletin, Links Australia magazine, an opt in email will be sent over the coming weeks. <p>Queensland Ballet Committee members held a discussion about the level of community interest in Queensland Ballet programs being held in the Western Downs.</p> <p>Community representatives confirmed there would be interest in Queensland Ballet partnership programs.</p>
j. Items for next agenda	<p>Deb Camden invited the Committee to propose agenda items for the next meeting.</p> <p>No agenda items were raised for the upcoming meeting.</p>

4. General Business

No general business items were raised.

5. Meeting Close

The next Central/Southern Regional Community Consultative Committee meeting will be held in Tara on Thursday 11 June 2015 at the Tara Customer Service Centre at 9am.

The meeting was closed by Deb Camden at 12.00pm.

6. Central/Southern Gas Field Community Committee Members

Representative	Organisation
Doreen Goldsmid	Chinchilla Family Support Centre
Leanne Evans	Chinchilla State School P&C
Patricia Peck	Wieambilla Estates Rural Subdivision
Jayne Swift	Ozcare
Terri Cobb	Western Downs Regional Council
Leisa Finch	Myall Youth and Community Network
Dean Russell	Dalby State High School
Bill Blake	Chinchilla Community Commerce and Industry
Ros Wade	Tara Neighbourhood Centre

Meeting Minutes

Beth Wood	Dalby Welcoming Community Committee
Michele Berkhout	TAFE Queensland South West
Cr Carolyn Tillman	Councillor - Western Downs Regional Council
Gayle Porter	Tara Futures Group Inc
Louise Sanderson	Goondir Health Services
Kathie Fletcher	Queensland Murray Darling Committee
