

Approval

To develop, construct, operate and decommission the marine facilities component of the Queensland Curtis LNG Project as described in referral EPBC 2008/4401.

This decision is made under sections 130(1) and 133 of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act).

person to whom the approval is granted	Queensland Gas Company Ltd (QGC) and BG International Ltd (BG)
proponent's ABN	ABN: 089 642 553 (QGC) ABN: 72 114 818 825 (BG)
proposed action	To develop, construct, operate and decommission marine facilities, on the mainland near Gladstone and on Curtis Island between Laird Point and Hamilton Point area, Queensland to service the LNG Facility: <ul style="list-style-type: none">• as described in the referral received under the EPBC Act on 18 August 2008; and• as described in the proponent's Environmental Impact Statement and Supplementary Environmental Impact Statement; and• as varied on 9 July 2010.
decision	To approve the proposed action for each of the following controlling provisions: <ul style="list-style-type: none">• World Heritage properties (sections 12 and 15A, EPBC Act)• National Heritage Places (sections 15B and 15C, EPBC Act)• Listed threatened species and communities (sections 18 and 18A, EPBC Act)• Listed migratory species (sections 20 and 20A, EPBC Act)
conditions of approval	This approval is subject to the conditions specified below.
expiry date of approval	This approval has effect until 31 October 2060.
name and position	The Hon Tony Burke MP Minister for Sustainability, Environment, Water, Population and Communities
signature	
date of decision	22.10.10

Conditions

Project area

1. The project area is the area substantially in accordance with the area indicated in Figure 1.
2. Dredging is to be limited to a maximum of 375,000m³ for the construction dock and 1,000,000m³ for the Materials Offloading Facility (MOF) both on Curtis Island.

Dredging Management Plan – Construction Dock

3. For the construction dock, the proponent must submit to the Minister a Dredging Management Plan which must include:
 - (a) mapping of significant and sensitive receptors in the area of the marine facilities, with linkages to applicable monitoring programs;
 - (b) assessment of all potential and real environmental risks to matters protected by the EPBC Act from dredging activities;
 - (c) appropriate measures (for example mitigation measures, performance indicators/trigger levels and corrective actions/management actions) that will ensure that there are no unacceptable impacts on the Great Barrier Reef World Heritage Area, Great Barrier Reef National Heritage Place, EPBC listed threatened or migratory species. These must include:
 - i. operating procedures to minimise injury to, or mortality of, EPBC Act listed threatened or migratory species from dredging activities or construction activities;
 - ii. reporting mechanisms that ensure reporting to the Minister within one business day of the proponent becoming aware of injury to, or mortality of, an EPBC listed threatened or migratory species caused by dredging activities;
 - iii. management triggers, based on results obtained from the Water Quality Monitoring Program, including a reporting requirement to advise the Department in writing within one working day when triggers are exceeded;
 - iv. contingency measures, based upon results of water quality and applicable research and monitoring programs, when dredging operations must be varied or suspended;
 - v. measures that minimise the risk of introduced marine pest species, including ballast-water management and vessel inspections for any non-domestic vessels; and
 - vi. responsive actions that will be undertaken in the event contingency measures are employed, including reporting to the Minister.
 - (d) details of dredge spoil placement; and
 - (e) provisions to sample and analyse dredge spoil composition.

4. The Dredging Management Plan must be submitted for the approval of the Minister. Commencement must not occur without approval. The approved plan must be implemented.
5. A dredge management plan satisfying State requirements and addressing the matters identified in this condition will be deemed to have been submitted and approved.

Note 1: Applicable research and monitoring programs may include programs undertaken in accordance with conditions attached to the approval for the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904).

Note 2: These conditions do not prevent the Gladstone Ports Corporation, on behalf of the proponent, from submitting a single dredge management plan which relates to both dredging for the construction dock under these conditions, and dredging undertaken under conditions attached to the approval for the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904).

Construction Management Plan

6. For the construction of the marine facilities on Curtis Island and the mainland, the proponent must submit to the Minister a Construction Management Plan which must include:
 - (a) assessment of all potential and real environmental risks to matters protected by the EPBC Act from construction activities;
 - (b) appropriate measures (for example mitigation measures, performance indicators/trigger levels and corrective actions/management actions) that will ensure that there are no unacceptable impacts on the Great Barrier Reef World Heritage Area, Great Barrier Reef National Heritage Place, EPBC listed threatened species or migratory species. These include:
 - i. operating procedures to minimise injury to, or mortality of, EPBC Act listed threatened or migratory species from construction activities;
 - ii. reporting mechanisms that ensure reporting to the Minister within one business day of injury to, or mortality of, an EPBC listed threatened or migratory species caused by construction activities;
 - iii. management triggers and contingency measures when construction or pile driving must be varied or suspended;
 - iv. measures that minimise the risk of introduced marine species, including ballast-water management and vessel inspections for any non-domestic vessels;
 - v. measures to minimise light emission onto the water from the loading jetty and construction docks including such measures as reducing light spill, during construction and operations; and
 - vi. responsive actions that will be undertaken in the event contingency measures are employed, including reporting to the Minister.
7. The Construction Management Plan must be submitted for the approval of the Minister within 20 business days of commencement. The approved plan must be implemented.

Dredging and dredge disposal – Material Offloading Facility

8. Dredging and disposal of dredge material associated with the Material Offloading Facility is to be undertaken in accordance with conditions imposed and the holder of the approval for the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904).

Note: This condition does not prevent the proponent from undertaking dredging on behalf of the Gladstone Ports Corporation, under conditions attached to the approval for the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904).

Dredging operations – Construction Dock

9. The proponent must not undertake any underwater dredge material rehandling.
10. Only one trailer suction hopper dredge (TSHD) is permitted to operate within Gladstone Harbour at any given time.
11. When the TSHD is in use, a maximum of two cutter suction dredges may operate at any given time unless otherwise prescribed in an approved Water Quality Monitoring Program required under conditions attached to the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904).
12. The TSHD must not operate in overflow mode except during the last one hour of flood tide and first three hours of ebb tide unless otherwise in accordance with the approved Water Quality Monitoring Program.
13. The TSHD must not operate in overflow mode for more than 30 minutes per cycle, with no more than two cycles per tide unless otherwise in accordance with the approved Water Quality Monitoring Program.
14. Where construction and/or dredging methods with lower environmental impacts are identified to be practical, these methods must be implemented.
15. In this condition, "at any given time" means at any given time with any other dredging operations being undertaken by another holder of an approval relating to dredging activities in the Port of Gladstone.

Note: Similarly to conditions attached to the approval for the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904), these conditions are intended to limit the number of dredges being operated at any one time in Port Curtis.

Environmental Management Plan – Water Mouse (*Xeromys myoides*)

16. To protect the Water Mouse (*Xeromys myoides*), the proponent must submit to the Minister an Environmental Management Plan (the Water Mouse Environmental Management Plan) which must include:
 - (a) results of a pre-clearance survey undertaken at the appropriate time and season for the species;
 - (b) a map of the location of potential habitat for the Water Mouse in proximity to marine facilities;
 - (c) measures that will be employed to avoid impacts on the Water Mouse or its potential habitat; and

- (d) if impacts on the Water Mouse or its potential habitat are unavoidable, propose offsets to compensate for the impacts.

Note: To avoid doubt, if a condition of another approval held by the proponent requires a Water Mouse Environmental Management Plan, the proponent may simultaneously meet the relevant requirements of both conditions by submitting a single plan. The plan may also be prepared in consultation with the Gladstone Ports Corporation in accordance with conditions imposed for the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904), or otherwise.

17. The Water Mouse Environmental Management Plan must be submitted for the approval of the Minister within 6 months of this Approval. The approved plan must be implemented.

Environmental Management Plan – Migratory Shorebirds

18. The proponent must submit to the Minister an Environmental Management Plan (the Migratory Shorebirds Environmental Management Plan) which includes measures for:
- a. managing the impacts of the action on listed Migratory Shorebirds including but not limited to the Whimbrel (*Numenius phaeopus*) and the Terek Sandpiper (*Xenus cinereus*);
 - b. determining baseline population densities and habitat utilisation for migratory shorebirds on or contiguous to the proponent's LNG facility site including, at a minimum, undertaking annual/twice annual surveys during northwards and southwards migrations;
 - c. minimising impacts from noise and light on the feeding and roosting sites of listed migratory shorebirds; and
 - d. monitoring the effect of the construction of the marine facilities on shorebirds, including but not limited to, and to the extent relevant:
 - i. dredge vessel movement;
 - ii. pile driving;
 - iii. construction dredging;
 - iv. noise impulse levels;
 - v. light spill;
 - vi. water quality reduction;
 - vii. decreased access to intertidal foreshore habitat;
 - viii. increased sedimentation; and
 - ix. displacement.
19. The Migratory Shorebirds Environmental Management Plan must be submitted for the approval of the Minister. Commencement, other than Construction Dock dredging, must not occur without approval. The approved plan must be implemented.

Note: To avoid doubt, the Migratory Shorebirds Environmental Management Plan may be prepared in consultation with the Gladstone Ports Corporation under conditions imposed for the Gladstone Western Basin Dredging and Disposal Project (EPBC 2009/4904).

Decommissioning Plan

20. Unless the proponent advises the Department that it cannot decommission the site because of lawful continuing use rights by a third party (that might include the State of Queensland), at least five years before the planned date of cessation of operations of the Marine Facilities on Curtis Island the proponent must develop a Decommissioning Plan. The Decommissioning Plan must:
- (a) ensure that, following the cessation of operations of the Marine Facilities on Curtis Island, decommissioning arrangements are prepared;
 - (b) define a timetable for the future implementation of decommissioning including for:
 - (i) the removal of remnant infrastructure and works that interfere with natural coastal processes, and human recreational and commercial activities;
 - (ii) the return of sediment levels and water quality in the immediate area of the Marine Facilities to pre-construction background levels; and
 - (iii) the rehabilitation of the Marine Facilities and associated sites to their natural state, and their ongoing management during rehabilitation.
21. If decommissioning does not commence on the date proposed in the initial Decommissioning Plan, the proponent must review the decommissioning plan before each subsequent third anniversary of the date of the submission of the initial decommissioning plan over the operational life of the Marine Facilities. The proponent must advise the Minister in writing of the outcomes of this review, including any proposed changes to the decommissioning plan. Any proposed changes to the decommissioning plan must be approved in writing by the Minister.
22. The Decommissioning Plan must be submitted for the approval of the Minister. Decommissioning must not occur without approval. Subject to condition 20, the approved plan must be implemented.

Joint Plans

23. A management plan required under these conditions may comprise a plan (a joint plan) submitted by the Gladstone Ports Corporation under conditions of approval for the Western Basin Dredging and Disposal Project (EPBC 2009/4904) or another LNG proponent. If a joint plan is submitted by the GPC or another LNG proponent for this purpose, it must also be specified as a plan for the purpose of (as relevant) these conditions.
24. If a joint plan is submitted under these conditions the plan may specify roles and responsibilities of the proponent, and the roles and responsibilities of another person. A role and responsibility of the proponent must be implemented by the proponent, unless otherwise specified in the joint plan.

Note: The purpose of this condition is to allow a single management plan to be submitted by different proponents to satisfy the requirements of conditions of separate but related approvals, so that actions with related potential impacts may be considered and addressed cumulatively.

Notification of commencement

25. Within 20 business days of commencement, the proponent must advise the Department in writing of the actual date of commencement.
26. If, at any time after 5 years from the date of this approval, the Minister notifies the proponent in writing that the Minister is not satisfied that there has been commencement of the action, the action must not commence without the written agreement of the Minister.

Request for variation of plans by proponent

27. If the proponent wants to act other than in accordance with a plan approved by the Minister under these conditions, the proponent must submit a revised plan for the Minister's approval.
28. If the Minister approves the revised plan, then that plan must be implemented instead of the plan originally approved.
29. Until the Minister has approved the revised plan, the proponent must continue to implement the original plan.

Revisions to plans by the Minister

31. If the Minister believes that it is necessary or desirable for the better protection of a relevant controlling provision for the action, the Minister may request the proponent to make, within a period specified by the Minister, revisions to a plan approved under these conditions.
32. If the Minister makes a request for revision to a plan, the proponent must,
 - (a) comply with that request; and
 - (b) submit the revised plan to the Minister for approval within the period specified in the request.
33. The proponent must implement the revised plan on approval of the Minister.
34. Until the Minister has approved the revised plan, the proponent must continue to implement the original plan.

Minimum timeframes for consideration of plans

35. For any plan required to be approved by the Minister under these conditions, the proponent must ensure the Minister is provided at least 20 business days for review and consideration of the plan, unless otherwise agreed in writing between the proponent and the Minister.

Compliance with State environmental and other authorities

36. The proponent must comply with all environmental authorisations issued by the State, including conditions of an environmental authority issued under the EP Act.

Provision of State plans

37. If a condition of a State approval requires the proponent to provide a plan then the proponent must also provide the plan to the Department or Minister on request, within the period specified in the request.

Timeframes

38. If these conditions require the proponent to provide something by a specified time, a longer period may be specified in writing by the Minister.

Auditing

39. On the request of and within a period specified by the Department, the proponent must ensure that:

- (a) an independent audit of compliance with these conditions is conducted; and
- (b) an audit report, which addresses the audit criteria to the satisfaction of the Department, is published on the Internet and submitted to the Department.

40. Before the audit begins, the following must be approved by the Department:

- (a) the independent auditor; and
- (b) the audit criteria.

41. The audit report must include:

- (a) the components of the project being audited;
- (b) the conditions that were activated during the period covered by the audit;
- (c) a compliance/non-compliance table;
- (d) a description of the evidence to support audit findings of compliance or non-compliance;
- (e) recommendations on any non-compliance or other matter to improve compliance;
- (f) a response by the proponent to the recommendations in the report (or, if the proponent does not respond within 20 business days of a request to do so by the auditor, a statement by the auditor to that effect);
- (g) certification by the independent auditor of the findings of the audit report.

42. The financial cost of the audit will be borne by the proponent.

43. The proponent must:

- (a) implement any recommendations in the audit report, as directed in writing by the Department;
- (b) investigate any non-compliance identified in the audit report; and
- (c) if non-compliance is identified in the audit report - take action as soon as practicable to ensure compliance with these conditions.

44. If the audit report identifies any non-compliance with the conditions, within 20 business days after the audit report is submitted to the Department, the proponent must provide written advice to the Minister setting out the:

- (a) actions taken by the proponent to ensure compliance with these conditions; and
- (b) actions taken to prevent a recurrence of any non-compliance, or implement any other recommendation to improve compliance, identified in the audit report.

Note: To avoid doubt, independent third party auditing may include audit of the proponent's performance against the requirements of any plan required under these conditions.

Reporting non-compliance

45. The proponent must, when first becoming aware of a non-compliance with these conditions, or a plan required to be approved by the Minister under these conditions:

- (a) report the non-compliance and remedial action to the Department within five business days;
- (b) bring the matter into compliance within a reasonable time frame specified in writing by the Department.

Record-keeping

46. The proponent must:

- (a) maintain accurate records substantiating all activities associated with or relevant to these conditions of approval, including measures taken to implement a plan approved under these conditions; and
- (b) make those records available on request to the Department. Such records may be subject to audit by the Department or an independent auditor in accordance with section 458 of the EPBC Act, or used to verify compliance with these conditions.

Note: Audits or summaries of audits carried out under these conditions, or under section 458 of the EPBC Act, may be posted on the Department's website. The results of such audits may also be publicised through the general media.

Financial assurance

47. The proponent must:

- (a) provide the Minister with a financial assurance in the amount and form required from time to time by the Minister for activities to which these conditions apply; and
- (b) review and maintain the amount of financial assurance based on proponent reporting on compliance with these conditions, and any auditing of the activities.

48. The financial assurance is to remain in force until the Minister is satisfied that no claim is likely to be made on the assurance.

Note: The financial assurance may be used for rehabilitation of habitat and other purposes not addressed adequately by the proponent during the life of the project.

Annual Environmental Return

49. The proponent must produce an Annual Environmental Return which:
- (a) addresses compliance with these conditions;
 - (b) records any unavoidable adverse impacts on MNES, mitigation measures applied to avoid adverse impacts on MNES; and any rehabilitation work undertaken in connection with any unavoidable adverse impact on MNES;
 - (c) identifies all non-compliances with these conditions; and
 - (d) identifies any amendments needed to plans to achieve compliance with these conditions.
50. The proponent must publish the Annual Environmental Return on the Internet within 20 business days of each anniversary date of this approval. In complying with this publication requirement, the proponent must ensure that it has obtained the relevant confidentiality and intellectual property rights of third parties.

Survey data

51. If requested by the Department, the proponent must provide all species and ecological survey data and related survey information from ecological surveys undertaken for MNES. The data must be collected and recorded to conform to data standards notified from time to time by the Department.

Publication of Plans

52. All plans approved by the Minister under these conditions must be published on the proponent's website within 30 business days of approval by the Minister.
53. The Department may request the proponent to publish on the internet a plan in a specified location or format and with specified accompanying text. The proponent must comply with any such request.

Dictionary

54. In these conditions, unless otherwise indicated:

Conditions means these conditions attached to the approval of the action;

Commencement means the substantial commencement of construction for the proposed construction dock as described in the referral EPBC 2008/4401.

Department means the Australian Government department responsible for administering Chapter 4 of the EPBC Act;

Environmental risk means any risk which has the potential to, or does impact, on the environment;

EP Act means the *Environmental Protection Act 1994* (Qld);

EPBC Act means the Commonwealth *Environment Protection and Biodiversity Conservation Act 1999*;

Minister means the Minister responsible for Chapter 4 of the EPBC Act, and includes a delegate of the Minister under s.133 of the EPBC Act;

MNES means matters of national environmental significance, being the relevant matters protected under Part 3 of the EPBC Act;

Plan includes a report, study, or strategy (however described);

Proponent means the holder of the approval to which these conditions relate, and includes any person acting on behalf of the proponent;

Referral means a referral under the EPBC Act including any variation of the referral.

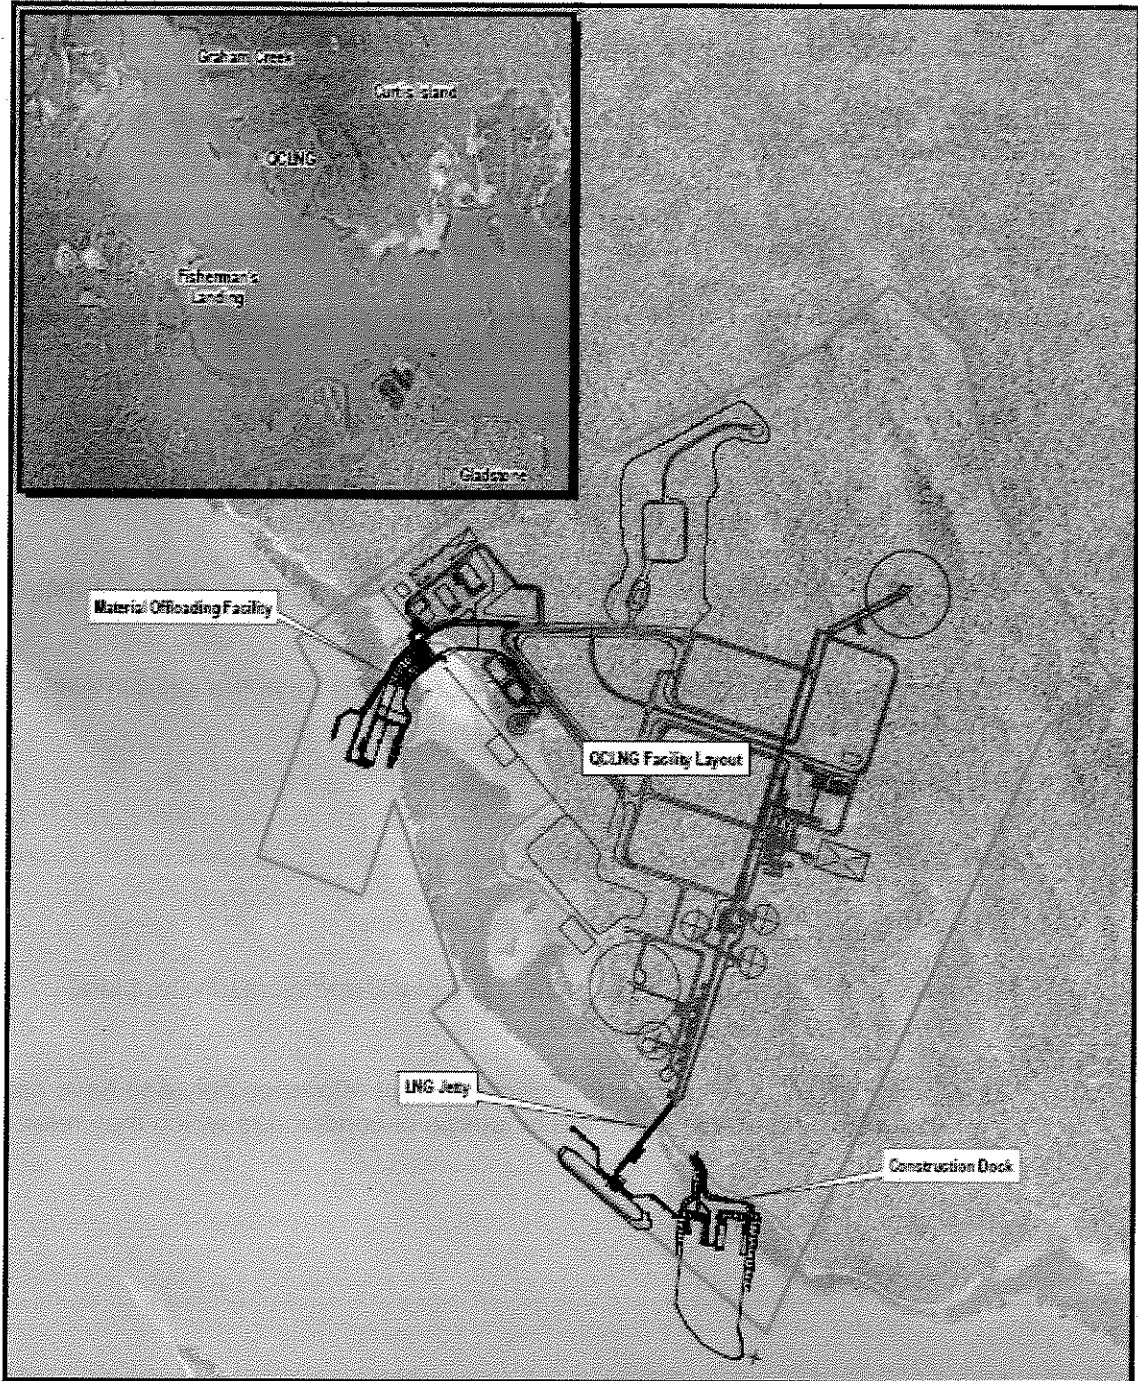

55. Unless otherwise indicated, words in these conditions have the same meaning as in (in the following order of priority):

- (a) the EPBC Act; and
- (b) the EP Act.

56. Unless the contrary is indicated, in these conditions:

- (a) words in the singular number include the plural and words in the plural number include the singular; and
- (b) condition headings are inserted for convenient reference only and have no effect in limiting or extending the language of condition to which they refer.
