

# ENVIRONMENT PEGGING PARTY REPORT

## PEC Project Environmental Clearance

DETAILS			
<b>Tenement (ATP / PL):</b>	PL171		
<b>Block – PACR Name:</b>	Lawton-Nth, Lawton #128, Access, Camp & Borrow Pit, QCLNG-BB31-SUP-ETS-350501 Rev 00		
<b>Date of Survey:</b>	22 July 2014		
<b>Reference:</b>	LAW001		
<b>Facility Type:</b>	<b>Wells</b> <input checked="" type="checkbox"/> Appraisal <input type="checkbox"/> Microseismic <input type="checkbox"/> Gravel Pit	<input type="checkbox"/> Core <input type="checkbox"/> Development / Production <input type="checkbox"/> Directional <input checked="" type="checkbox"/> Campsite	<input type="checkbox"/> Exploration <input type="checkbox"/> Monitoring <input type="checkbox"/> Tiltmeter Array <input checked="" type="checkbox"/> Access Track
	<input type="checkbox"/> Seismic <input type="checkbox"/> Trunkline <input type="checkbox"/> Comms Towers <input type="checkbox"/> FCS <small>(Field Compression Station)</small>  <input type="checkbox"/> Other:	<input type="checkbox"/> Gathering System <input type="checkbox"/> Gas Pipeline <input type="checkbox"/> Fibre Optic Cable <input type="checkbox"/> CPP <small>(Central Processing Plant)</small>	<input type="checkbox"/> Security Hut <input type="checkbox"/> Water Pipeline <input type="checkbox"/> Pond <input type="checkbox"/> Frac Pond <input type="checkbox"/> WTP <small>(Water Treatment Plant)</small>
ACTIVITIES			
<b>Details of Activity:</b>	Clearance survey of Lawton #128, Camp & Access.		
RECOMMENDATIONS			
<input type="checkbox"/> No Environmental issues on site <input type="checkbox"/> Environmental issues identified and surveyed on site <input type="checkbox"/> Environmental Officer required on site during clearing activities <input type="checkbox"/> Fauna spotter required  <input type="checkbox"/> Other:			
<b>This report has been prepared by a suitably qualified ecologist in accordance with DSEWPAC Condition 5g (iii) for EPBC Approval 2008/4398</b>			
QGC confirms that all site assessments and field ecological surveys: <ul style="list-style-type: none"> <li>• Have taken into account and reference previous ecological surveys undertaken in the area and relevant new information on likely presence or absence of MNES;</li> <li>• Have been undertaken by a suitably qualified ecologist approved by the Department; and</li> <li>• Apply best practice site assessment and ecological survey methods appropriate for each listed threatened species, migratory species, their habitat and listed ecological communities; and</li> <li>• Apply the mapping of environmental constraints class Zone 4a, the infrastructure location requirements, minimum no impact zones; impact risk zones; and the width requirements for linear infrastructure corridors described in condition 5(e)".</li> </ul>			

# ENVIRONMENT PEGGING PARTY REPORT

SPECIFIC ENVIRONMENTAL ISSUES	
<b>Block – PACR Name:</b> <i>(Same as above):</i>	Lawton-Nth, Lawton #128, Access, Camp & Borrow Pit, QCLNG-BB31-SUP-ETS-350501 Rev 00
<b>Brief description of vegetation / land use:</b>	Trees: Poplar Box Eucalyptus populnea, Wilga Geijera parviflora, False Sandalwood Eremophila mitchellii Shrubs: Pretty Wattle Acacia decora, Brush Myrtle Psydrax oleifolia, Black Cotton-bush Maireana microphylla, Currant Bush Carissa ovata, Wait a While Capparis lasiantha Ground cover: Pasture grasses predominately Buffel Grass Cenchrus ciliaris Land Use: Pasture grazing
<b>Were any REs identified and what are they?</b> <b>Are these correctly mapped?</b>	Non remnant vegetation as mapped - no updates required.
<b>Threatened Ecological Communities (TEC) identified:</b>	There are no TECs within the vicinity of the clearance areas.
<b>Zone 4a or b Areas and Impact Zones identified:</b>	There are no 4a/b impact zones within the vicinity of the clearance areas.
<b>High Value Regrowth present / impacted:</b>	There is no HVR present.
<b>Regrowth Present/Impacted:</b>	Regrowth Pretty Wattle Acacia decora is sparsely scattered throughout the Lot, estimated 5 years old.
<b>EVNT Flora species present / impacted (EPBC or NCA):</b> <b>Is the area identified as a High Risk Area identified on a Protected Plant Trigger Map:</b>	The area is not identified on a Protected Plant Trigger Map. There were no EVNT flora species identified.
<b>Is the area mapped as Potential Habitat for any EVNT fauna:</b> <b>If 'Yes', does the area contain microhabitat features as per the</b>	QGC's Species Likelihood Matrix indicates the area is unlikely habitat for any EVNT fauna species.

# ENVIRONMENT PEGGING PARTY REPORT

<b>SSMP which would indicate likely habitat for the species OR was the species sighted?</b>	
<b>Watercourses and Wetlands:</b>	There are no mapped water courses, referable wetlands or melon holes within the vicinity of any of the clearance areas.
<b>Declared Weeds:</b>	Prickly Pear <i>Opuntia</i> spp (Class 2 Declared weed) is scattered throughout the property and within the clearance areas.
<b>Additional Considerations:</b>	Nil
