

Working near the QCLNG pipeline

QGC Pty Limited, the Australian subsidiary of BG Group, is developing natural gas from coal seams in the Surat Basin of southern Queensland for domestic and export markets through its Queensland Curtis LNG (QCLNG) Project.

Steel pipelines provide a safe way to transport natural gas. This fact sheet provides important information about safely conducting activities on and near the pipeline easement. Further information regarding the permitted and restricted activities is detailed in individual landholder easement agreements.

Landholders planning to do any digging on the easement should call 'Dial Before You Dig' to obtain the specific location of the buried pipeline and associated infrastructure.

For the following activities landholders can continue to operate their business as usual on or near the pipeline easement:

- Grazing
- Cultivation of crops
- Top dressing and pasture seeding
- Controlled burning practices
- Non-soil disturbance weed control
- Transporting or traversing of heavy vehicles or machinery within Queensland Road Weight Limits at designated crossing points
- Non-intrusive recreational activities

In accordance with individual landholder easement agreements, prior written agreement is required from QGC for any of the following activities:

- Digging greater than 300mm, including ploughing and deep ripping
- Building of any structures, pits, wells, bores, dams, paved roadways, pipelines, fences and cables
- Changing the ground surface level
- Planting of vegetation with deep roots
- Transporting or traversing of heavy vehicles exceeding Queensland Road Weight Limits across or along the easement
- Blasting or seismic survey within one kilometre of the easement

No activity must be undertaken which would jeopardise the safety or operation of the pipeline. Under Queensland law, penalties apply if a person conducts any non-approved work within or near a pipeline easement, and/or damages, interferes with any part of a pipeline.

In the event of an emergency or natural disaster (flood, bushfire, etc), call **000** or **112** from a mobile.

Dial before you dig

Call 1100

If you plan to do any work on the easement.

The Essential First Step.
