

## Shell Unleaded 91 FAQs

### How does the Shell Unleaded with Fuel Economy Formula work?

Shell Unleaded with Fuel Economy Formula is designed to help improve fuel economy by reducing efficiency losses caused by engine deposits.\*

### How does this fuel compare to the previous Shell Unleaded petrol in terms of fuel economy/ money saved?

Shell Unleaded with Fuel Economy Formula is designed to give you extra kilometres. It contains Shell's Fuel Economy Formula which is designed to improve cleanliness, therefore help improve engine efficiency. We do not claim specific fuel economy benefits for our products because the fuel economy any particular motorist achieves is also highly dependent upon driving style, weather conditions and the type and condition of the vehicle – try it and judge for yourself.

### Why is the new Fuel Economy Formula not used in all Shell petrol?

Shell Unleaded with Fuel Economy Formula has been designed to meet the needs of drivers seeking a fuel designed to help provide improved fuel economy at a competitive price. In fact, Shell Unleaded with Fuel Economy Formula has been specifically developed to offer extra kilometres. Other Shell fuels are designed to meet the needs of customers seeking different performance attributes from their fuel.

### Can I mix it with another non-Shell petrol?

Yes. Shell Unleaded with Fuel Economy Formula can be mixed with other unleaded automotive fuels. However, to help maximise the opportunity to realise the full benefits it is designed to offer, Shell recommends that you refuel with Shell Unleaded with Fuel Economy Formula every time.

\* Based on tests using fuel without additives and may vary by vehicle.
